STEAK WEIGHT, CAST IRON, 9" L
9" L X 5" W

List Price: \$23.60 EA

Pack: 10

Cu. Ft.: 1.10

Weight: 30 lbs

Accelerate the grilling process with American Metalcraft's durable cast iron steak weights. Simply press one of the weights down on any meat of your choice, and watch as both sides of the meat quickly and evenly absorb all the extra heat! Highly versatile, these weights are even great for pressing out unwanted grease from your steaks and burgers, as well as flattening out bacon. They are conveniently designed with a wooden handle for safe and easy handling. Because of their commercial-grade construction, these steak weights will last you a lifetime!

With a length of 9" and width of 5", this cast iron steak weight has an unbeatable classic design. Ideal for steaks, burgers, and bacon, this weight considerably cuts down cook times! Simply press the weight down on your meat of choice to add extra heat from the griddle to the bottom of the meat. The heat stored in the steak weight then transfers heat to the top of the meat for faster and more even cooking all around! It doesn't end there - the pressure from the weight helps press out unwanted grease and fat for healthier eating. You can even use this versatile weight to flatten bacon and create perfectly uncurled strips. Constructed for commercial use, this steak weight has a wooden handle that offers a secure and comfortable grip. Use this highly durable cast iron steak weight at your restaurant, grille, food truck, or hotel kitchen. Hand wash only.
