BURGER MOLD, ADJUSTABLE, 4-1/2" DIA.
4-1/2" DIA.

List Price: \$34.40 EA

Pack: 36

Cu. Ft.: 1.72

Weight: 38 lbs

Produce perfect patties every time with our adjustable burger mold! With a 4-1/2" diameter, this handy tool ensures consistent burger sizing that you simply cannot accomplish by weighing and sculpting each patty by hand. Not only does this mold help with portion control, but it also considerably cuts down labor time and costs. To use, simply place the raw burger meat on the base of the press and close the cover with the welded-on handle. Take advantage of the adjustable knob to choose your desired burger thickness between 1/8" and 3/8". In addition to molding hamburgers, this tool is also a great option for creating uniform crab cakes, as well as fish and veggie burgers! Designed for commercial use, this press can be attached to your countertop with screws for maximum stability.
