Uncover the key to pizza-making success with these Stacking Covers! Available in a variety of sizes, these round pan separators allow you to run a more efficient kitchen and business. Scrambling to prepare orders is a stressor of the past – you can now pre-make your pizza or pastry dough in advance, and store it until you are ready to finish or bake it. Stack the covered pans one on top of the other to save space in the refrigerator or on the counter. The covers also keep your dough fresh and protect it from contaminants. This means you will be able to impress your customers with short wait times, without compromising the integrity and taste of their pizza or dessert. These products can be used as stacking covers for our DEP, 2000, and 9000 Series pans, or just as covers for our 4000, 8000, 5000, and 5100 Series pans. The aluminum construction resists corrosion and wear, so you will be able to enjoy these covers in your commercial kitchen for years on end!

With a top diameter of 10-1/2", inside diameter of 8-3/4", and depth of 1/4", this round cover for 9" inside diameter pans is a must-have in your pizza kitchen. With this lid, you will be able to save time by preparing your pizza dough in advance and having it ready for your customers' requested toppings. Using a cover for your pre-made dough will maintain the freshness and integrity of your patrons' pizzas, as it provides protection from contaminants. Depending on the type of pan, you can also use this product as a stacking cover or pan separator to stack pre-made dough and pizzas until you are ready to bake them. It can be used as just a cover for our 4009, 8009, 5009, and 5109 pans, or a stacking cover for our DEP9, 2009, and 9009 pans. Constructed of 18 gauge, 1 mm standard-weight aluminum, this durable cover is rust, corrosion, and warping resistant. Use this lid at your pizzeria, restaurant, diner, or hotel kitchen. Made in the US. Hand wash only using aluminum-safe detergent.
