These round CAR Tapered/Nesting Pans rank high in convenience and performance! Ideal for hearty deep dish and topping-loaded pizzas, these pans are reliable in fast-paced commercial kitchens where quality and efficiency are of the essence. Their durable and sturdy aluminum construction heats quickly and evenly, creating a fluffy, golden crust your customers will rave about to anyone and everyone! Plus, our CAR pans are specially designed with unfinished edges, so you can cut dough perfectly to size without the need for additional tools. Can you say shorter preparation and clean up times?! These pans also easily stack and take up minimal space in storage, so you will have plenty of room for all your other American Metalcraft products. No corrosion or wear here – these pans will be with you for the long haul!

This round, tapered nesting CAR pan, with a 10" top outside diameter, 9" bottom inside diameter, and 11/16" depth, stands apart from standard pizza pans. Constructed from 14-gauge, 1.6 mm, dark hard-coat anodized aluminum with a non-reactive oxide surface, it heats faster and more evenly than standard pans while preserving flavor and color. Now featuring the enhanced EZ Release coating, it lifts pizzas effortlessly and makes cleanup a breeze—even with sticky toppings. Tapered sides form a fluffy, even crust, while the unfinished edges trim dough precisely to size. The durable aluminum construction resists corrosion and wear for years of reliable performance. Designed for space-saving nested storage, this pan is proudly made in the USA. Hand wash only with an aluminum-safe detergent.

- Aluminum
- Dark Gray
- Handwash Only
- Specialized pretreatment results in a low-friction finish for easy dough release and effortless cleaning
